

Our control panel solutions are designed to meet the rigorous demands of industrial environments, providing you with reliability, customization, and seamless operation. We manufacture a wide range of control panels tailored to specific needs:

Motor Starter Control Panels

Designed to support efficient motor operations, our panels include:

Soft Starters – Reduce inrush currents and mechanical stress for smoother startups.

VFD Starters – Enable variable speed control to optimize motor performance.

Star-Delta Starters – Ideal for applications requiring high starting torque and energy efficiency.

DOL Starters – Reliable and straightforward for applications with minimal starting requirements.

PLC-Controlled Panels

Enhance automation with our PLC panels, designed for versatile and programmable control to integrate seamlessly with factory processes and machinery.

Generator Synchronizing Panels

Ensure smooth and reliable power distribution with our generator synchronizing control panels, built to manage power flow and prevent downtime effectively.

Factory Control Panels

Custom-engineered for your specific operational needs, our factory control panels ensure centralized management and streamlined control across all factory systems.

Every panel is constructed with premium materials and engineered for durability, meeting all required industry standards. Whether you're in manufacturing, construction, or energy, our control panels provide reliable performance and exceptional control.
